FIELD FABRICATION

SFI is well qualified to supply and erect field fabricated, stainless steel tanks and equipment.

- 25 years in business.
- SFI got its start building large tanks on-site.
- Knowledgeable personnel having hundreds of years combined experience in tank fabrication.
- Welders are ASME certified.
- Crews consist of full-time SFI employees.

Dedicated to growth and meeting customer's needs.

- Ongoing development of field fabrication methods and equipment.
- Tank capacities over 600,000 gallons.
- New construction or renovation.
- Always evolving, tackling challenges, improving skills.

Safe and Efficient working environment.

- Crews use jacking devices to erect tanks while allowing the workers to remain on the ground.
- Working at ground level promotes safety .
- Jacking devices save both time and money (scaffolding and cranes typically are not required).
- Able to erect tanks in restricted areas such as under a roof .

High Quality workmanship.

- Experienced ASME certified welders.
- Working on the ground provides greater stability for the welder.
- Automated equipment is used for much of the welding and grinding.

When it comes to field fabricated stainless steel tanks, SFI has what it takes - highly skilled personnel, innovative equipment, and a company-wide commitment to do our best for our customers.

SFI has field fabricated hundreds of storage tanks like these.

High Quality Field Fabricated Tanks for a Quarter Century
