FREEZER ENCLOSURES

The **SFI Freezer Enclosure** is a highly specialized (over 80 installations worldwide) stainless steel “box” designed to provide a sanitary environment for various food and dairy processes.

- Fully welded stainless steel construction allows for complete sanitation in minimal time.
- No gaskets or caulking required.
- Insulation (top, bottom, and sides) provides an environment for efficient freezing (or cooking).
- Design can be modified to accommodate various processing applications or conveying equipment.
- Field erected by experienced craftsmen. Suitable for new construction or replacement.
- Interior materials of construction are either stainless steel or synthetics.
- Insulated personnel access doors, equipped with safety latch, allows opening door from inside.
- Roof sections are pre-fabricated in the shop and shipped to the jobsite, ready for installation.
- Connections are fully welded to the inner and outer walls to maintain the integrity of the sealed enclosure.
- Expansion joints support expansion and contraction due to temperature changes.
- Surfaces are sloped to drain.
